Detailed Office Action

Status of the Claims

Acknowledgement is hereby made of receipt and entry of the communication filed 24 February, 2009. Claims 26, 28-31, and 33-35 are pending in the instant application.

37 C.F.R. § 1.98

The information disclosure statement filed 24 February, 2009, has been placed in the application file and the information referred to therein has been considered.

35 U.S.C. § 112, First Paragraph

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Written Description

The previous rejection of claims 26, 28-31, and 33-35 under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention, is hereby withdrawn in response to applicants' arguments.

Enablement

The previous rejection of claims 26, 28-31, and 33-35 under 35 U.S.C. § 112, first paragraph, as failing to comply with the enablement requirement, is hereby withdrawn in response to applicants' arguments.

Nonstatutory Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 U.S.P.Q.2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 U.S.P.Q.2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 U.S.P.Q. 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 U.S.P.Q. 761 (C.C.P.A. 1982); *In re Vogel*, 422 F.2d 438, 164 U.S.P.Q. 619 (C.C.P.A. 1970); and *In re Thorington*, 418 F.2d 528, 163 U.S.P.Q. 644 (C.C.P.A. 1969). A timely filed terminal disclaimer in compliance with 37 C.F.R. § 1.321(c) or § 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the

Art Unit: 1648

scope of a joint research agreement. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 C.F.R. § 3.73(b).

Upon further reconsideration, claims 26, 28-31, and 33-35 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 7,118,859. The claims of the '859 patent are directed toward methods of inhibiting HIV-1 infection of CD4⁺ cells by administering anti-PM-1 monoclonal antibodies (e.g., PA-7). The claims of the instant application are simply directed toward methods of inhibiting fusion of an HIV-1 Env with a CD4⁺ cell by administering an anti-PM-1 Mab and are not deemed to be patentably distinct. Anti-PM-1 Mabs exert the activities by inhibiting fusion of the HIV-1 Env to CD4⁺ cells. Both methods recite the same method step (e.g., contacting a CD4⁺ cell with an anti-PM-1 Mab) and the Mabs of the '859 patent fall within the scope of the instantly claimed invention. Therefore the claims are not patentably distinct.
